Shawn McNurney | (520) 500 - 7559 | shawnmcnurney@gmail.com | Hillsboro, OR

Summary

As an Electrical and Computer Engineering student with a minor in Computer Science, I am actively building a technical foundation in data structures and engineering computation. I am eager to leverage my background in complex systems troubleshooting and root cause analysis toward a career in data science. I bring a strong analytical mindset and a proven track record of synthesizing data-driven insights to optimize operational efficiency and solve logistical problems.

Education

Oregon State University | *Bachelor of Science in Electrical and Computer Engineering, Minor in Computer Science*

Expected Graduation: June 2027 | GPA: 3.87
Relevant Coursework: Data Structures, Engineering Computation, Technical Writing, Design Engineering and Problem Solving, Business Writing, and Design Thinking.

Skills

- **Technical Skills:** Python, Java, Ruby, HTML, CSS, C/C++, Luau, MATLAB, SystemVerilog, LTspice, Quartus Prime, ModelSim, Fusion 360, KiCad, CMMS & BMS Software
- **Hardware & Electronics:** Arduino, ESP32, RISC-V, FPGA (DE10-Lite), SMD Soldering, Scopy, ADALM2000
- **Transferable Skills:** Data Analysis, Root Cause Analysis (RCA), Project Management, Technical Communication, Process Optimization, Cross-functional Collaboration

Projects

- **RISC-V Temperature Monitor:** Designed and prototyped a liquid silicone baby bath thermometer featuring a RISC-V microcontroller, thermistor, and wireless charging circuit.
- **Logistics Game Development & Automation:** Programmed server architectures, plot isolation, and resource automation logic using Luau for a custom Roblox game combining farming and factory logistics.
- **Electro-Mechanical Prototyping:** Modeled a 14-inch modular lantern in Fusion 360—calculating Z-axis constraints and joint strength—and integrated a custom UV-A LED circuit powered by adapted 18V batteries.

Experience

Legacy Health | Portland, OR | *Facilities Engineer* | 2024 – Present

- Analyze building management system (BMS) data to maintain critical hospital infrastructure and ensure regulatory compliance.
- Perform root cause analysis on complex technical issues, minimizing downtime and ensuring continuous business operations.

- Draft comprehensive Standard Operating Procedures by synthesizing operational data and aligning with Metro LME JATC Standards.

Darigold | Portland, OR | *Utilities Engineer* | 2022 – 2024

- Monitored and evaluated performance metrics for complex mechanical systems, including wastewater treatment and ammonia refrigeration.
- Collaborated with cross-functional teams to identify process bottlenecks and implement data-informed utility operation improvements.

Daicel Manufacturing | *Engineer Technician II* | 2021 – 2022

- Developed and diagnosed automated manufacturing equipment involving mechanical, electrical, pneumatic, vacuum, VFD, hydraulic, PLC, HMI, and Fanuc robotic systems.
- Identified and implemented solutions to improve automated airbag manufacturing processes.
- Collaborated with cross-functional teams to optimize equipment performance and reliability.

HGO (Hazelnut Growers of Oregon) | *Machine Operator Lead* | 2018 – 2019

- Led a team of 5 in operating and maintaining heavy automated machinery, including installation, fabrication, maintenance, training, and repairs.
- Interpreted engineering blueprints, schematics, and technical drawings to support equipment upkeep.
- Ensured operational efficiency and safety compliance in a large-scale processing plant.

McKesson | Wilsonville, OR | *Slot Info Lead* | February 2017 – August 2018

- Generated reports and analyzed large datasets to identify trends and optimize product placement strategies for over 30,000 items.
- Developed and implemented a data-driven slotting system that significantly increased item pickers' efficiency and productivity.

Microsoft Surface Hubs Manufacturing | Wilsonville, OR | *Repair Technician* |2015 – 2017

- Diagnosed and resolved manufacturing process issues for Surface Hub devices.
- Interpreted engineering blueprints, schematics, and technical drawings to support repairs.
- Collaborated with engineers to develop and implement permit fixes for manufacturing challenges.
